LINEAGES NO LONGER PRESENT

1 lineage(s) in the previous edition are not in this one. A lineage leaving MalAvi is always an editorial decision, so each of these should be one somebody made deliberately.

LINEAGE	PARASITE GENUS	MORPHOSPECIES	GENBANK
STRALU01	Leucocytozoon		PV357403

CHANGES TO EXISTING LINEAGES

22 lineage(s) MalAvi already held now record something different. These are corrections to primary facts — an accession, a morphospecies assignment, a sequence — not recomputed summaries.

LINEAGE	FIELD	WAS	NOW

WW9	GENBANK_ACC	Not sub	Not Sub

1 lineage name(s) could not be compared row by row, because more than one row carries the name in one of the two editions and there is no way to say which row became which: TUPHI01 (2 row(s) before, 2 now). Their derived values are excluded from the corrections below as well. A repeated lineage name also breaks any join that treats the name as a key, so each of these wants a decision.

STUDIES ADDED

6 study/studies enter MalAvi with this edition. "Records" counts the host and vector records this edition credits to each of them.

REFERENCE	YEAR	TITLE	JOURNAL	RECORDS
Grudens & Islam 2026	2026	Effects of avian malaria in a population of cerulean warbler (<i>Setophaga cerulea</i>) with first documentation of haemosporidian lineages infecting the species	J Parasitol	12
Kakogawa et al 2019	2019	Detection of avian haemosporidia from captive musophagid birds at a zoological garden in Japan	J Vet Med Sci	4
Perrin et al 2026b	2026	Disentangling environmental and within-host drivers of parasite dynamics in natural populations	Mol Ecol	38
Stankovic et al 2025	2025	Prevalence, genetic diversity and pathogenicity of avian haemosporidian parasites co-infection in free-living Long-eared Owls (<i>Asio otus</i> Linnaeus, 1758)	Integrative Zoology	13
Stankovic et al 2026	2026	New data on possible abortive development of <i>Haemoproteus lanii</i> in a phylogenetically distant passerine host species	Acta Zoologica Bulgarica	3
Yang et al 2021	2021	Neglected parasite reservoirs in wetlands: Prevalence and diversity of avian haemosporidians in waterbird communities in Northeast China	Int. J. Parasitol. Parasites Wildl.	76

RECORDS

Host records

265 added, 7 removed, 84 changed — 18,493 rows before, 18,751 now.

3 key(s) identify more than one row in one of the two editions. Rows under those keys are reported as added or removed and are never paired up into an edit, because which copy became which cannot be known.

Added records, by study

REFERENCE	RECORDS	LINEAGES	HOST SPECIES	COUNTRIES

References (studies)

6 added, 1 removed, 0 changed — 526 rows before, 531 now. The studies added are listed under **Studies added** above.

1 key(s) identify more than one row in one of the two editions. Rows under those keys are reported as added or removed and are never paired up into an edit, because which copy became which cannot be known.

HOSTS AND GEOGRAPHY

Host species new to MalAvi (9)

Anas zonorhyncha, Ardea purpurea, Callipepla squamata, Dendroica cerulea, Mareca falcata, Mareca strepera, Sibirionetta formosa, Spatula clypeata, Tachybaptus ruficollis

Countries new to MalAvi (0)

No country is new to MalAvi in this edition.

CORRECTIONS TO THE GRAND LINEAGE SUMMARY

The summary's tallies, its Passeriformes flag and its twelve region flags are recomputed from the host and vector records every time a release is built, so this

section is where the records and the previously published summary disagreed. 339 of the 5,365 lineages present in both editions carry at least one corrected value.

These are corrections, not new data: the records supporting them were already in MalAvi. A large number here means the published summary had drifted from its own records, which is what regenerating it is for.

COLUMN	LINEAGES CORRECTED	EXAMPLE
NORTH_AMERICA	285	AEGACA01: blank → 1
SUM_HOST	57	ACCBAD01: 7 → 8
SUM_GENUS	42	ACCBAD01: 7 → 8
SUM_FAMILY	24	ACCBAD01: 5 → 6
SUM_ORDER	15	ACCBAD01: 4 → 5
PASSERIFORMES	3	SETCER01: 0 → 1
ASIA	2	BGR3: blank → 1
UNKNOWN_REGION	2	BUTLIV01: blank → 1
EUROPE	2	STOCC13: blank → 1
SUM_VECTORS	1	SGS1: 42 → 11

Prepared automatically when edition 2026-09-15 was built, by comparing it with edition 2026-03-23 table by table. Corrections and additions to MalAvi are welcome through the submission form.
